PROFILE

15+ years in software development and technical leadership. Self-learner with a track record of adapting to complex domains and delivering high-impact systems. Autonomous, production-oriented, and focused on growth. References available upon request.

EXPERIENCE

Tech Lead — Camunda

Feb 2024 – Present · 📍 Berlin · 🌐 Remote

Workflow automation platform for complex business processes (BPMN/DMN engine at scale)

- ▶ Led **P0 Job Worker Dashboard** epic (**3-person team**, ~3 months) — became **top committer on the Core monorepo** despite it not being primary focus
- ▶ Achieved **30× CPU reduction** and **10× I/O throughput** improvement through performance engineering
- ▶ Authored approved architecture proposal (**Jobs Statistics API**, engine-collected metrics); aligned Connectors, Core & Console teams
- ▶ Rebuilt release pipeline: automated triggering, test parallelization, flaky retries — **near-zero manual steps** per release
- ▶ Tech lead for **5 engineers**: mentoring, solution design, incident response, cross-team alignment

Sr. Engineering Manager — Alva

May 2022 – Feb 2024 · 📍 Stockholm · 🌐 Remote

Labs

Talent assessment SaaS — science-based hiring tools for mid-to-large enterprises

- ▶ Resolved engineering-wide issues: **developer experience**, broken cross-team processes with design and support
- ▶ Created **system design interview process**, improving hiring quality; worked with Terraform, GKE, PostgreSQL

Co-founder & Tech Lead — Clozzle

Sep 2020 – May 2022 · 📍 Toulouse · 🌐 Remote

Real estate SaaS startup — tools for property professionals

- ▶ Defined and executed **product roadmap**; built full stack on **AWS** (Lambda, EC2, Cognito) with Quarkus native (Java, Spring WebFlux)

Tech Lead — Nanolike

Nov 2018 – Sep 2020 · 📍 Toulouse · 🌐 Remote

IoT startup — smart sensors for industrial fill-level monitoring (silos, tanks)

- ▶ Designed **microservices architecture** (Kafka, Docker, AWS) and built the **monitoring frontend from scratch** — real-time device dashboard with fill-level visualization
- ▶ Pioneered the **silos monitoring product line**, which became the company's new core offering

Software Architect — Sigfox

Sep 2013 – Nov 2018 · 📍 Toulouse

Global IoT network operator — 1B+ connected objects across 70 countries

- ▶ Designed scalable microservices (Java, MongoDB, Prometheus, Grafana) handling **5B metrics/day**
- ▶ Reduced bandwidth by **50%**, increased monitoring capacity **×10**; designed and implemented **RBAC system**

EDUCATION

Master's Degree — with distinction

2003 – 2008

Robotics, AI & Software Engineering · IUP Paul Sabatier, Toulouse
