TECHNICAL

Orchestration Java platforms
Distributed systems APIs
Kubernetes Docker Kafka
Terraform CI/CD Observability
GCP AWS Source-available

STACK

Java Spring TypeScript
React Python

LANGUAGES

French — Native
English — Fluent

PROFILE

Hands-on Lead Software Engineer with 15+ years building Java-based distributed systems and platform products. Recent workflow automation/orchestration experience at Camunda, including public/source-available platform contributions. Strong track record in performance engineering, CI/CD automation, observability, mentoring, and translating product/customer needs into simple, scalable solutions.

EXPERIENCE

Tech Lead, Engineering — Camunda

Feb 2024 – Present · 📍 Berlin · 🌐 Remote

Workflow automation platform with public/source-available components for complex business processes (BPMN/DMN engine at scale)

- ▶ Led **P0 Job Worker Dashboard** delivery across Connectors, Core, and Console (**3-person team**, ~3 months) — shipped ahead of commitment; became **top committer on the public/source-available Core monorepo**
- ▶ Achieved **30× CPU reduction** and **10× I/O throughput** improvement through targeted performance engineering on a critical epic
- ▶ Authored approved architecture proposal (**Jobs Statistics API**, engine-collected metrics); led scalability and performance trade-off discussions
- ▶ Rebuilt Connectors release pipeline: automated triggering, test parallelization, flaky retries, milestone management, and Slack observability — **near-zero manual intervention**
- ▶ Tech lead for **5 engineers**: code reviews, mentoring, solution design, incident support, and Product/engineering alignment

Sr. Engineering Manager — Alva

May 2022 – Feb 2024 · 📍 Stockholm · 🌐 Remote

Labs

Talent assessment SaaS platform — science-based hiring tools for mid-to-large enterprises

- ▶ Led a team of **5 engineers** while staying close to product delivery, technical trade-offs, and execution quality
- ▶ Led delivery of **Structured Interviews** — a major product addition enabling science-based interview frameworks for customers
- ▶ Partnered with Product, Design, and Customer Support to improve requirements clarity, cross-team processes, and delivery predictability

Co-founder & Tech Lead — Clozzle

Sep 2020 – May 2022 · 📍 Toulouse · 🌐 Remote

Real estate SaaS startup — tools for property professionals

- ▶ Defined and executed the **product roadmap** from 0 to 1; built **AWS** infrastructure and full stack using **Quarkus native** (Java, Spring WebFlux)

Tech Lead — Nanolike

Nov 2018 – Sep 2020 · 📍 Toulouse · 🌐 Remote

IoT startup — smart sensors for industrial fill-level monitoring (silos, tanks)

- ▶ Designed backend roadmap and **event-driven microservices architecture** (Kafka, Docker, AWS)
- ▶ Built the **monitoring frontend from scratch** — real-time device dashboard; pioneered the **silos monitoring product line**, which became the company's new core offering

Software Architect — Sigfox

Sep 2013 – Nov 2018 · 📍 Toulouse

Global IoT network operator — 1B+ connected objects across 70 countries

- ▶ Designed scalable and highly available Java microservices architecture (MongoDB, Prometheus, Grafana)
- ▶ Reduced bandwidth consumption by **50%**, increased device monitoring capacity **×10**, handling up to **5B metrics/day**; designed and implemented RBAC system

EDUCATION

Master's Degree — with distinction

2003 – 2008

Robotics, AI & Software Engineering · IUP Paul Sabatier, Toulouse
